Section I. Instructions to Offerors

I.1. Introduction

Chemonics, the Buyer, acting on behalf of the U.S. Agency for International Development (USAID) and the USAID Harvest Activity (hereinafter, “Harvest”), under contract number **72012124C00001** is soliciting offers from companies and organizations to submit proposals to participate with Harvest to provide small and medium-sized enterprise (SME) farmers with a tool for managing price risks, on teaching them to analyze cause-and-effect relationships in the market and accordingly increasing their margins by improving their selling prices. Harvest intends to award one or more subcontracts to selected companies/organizations.

Harvest aims to enable supported male and female grain and oilseed farmers, including those from marginalized and underserved groups, to return production and income for target commodities to at least pre-war levels while improving production efficiency and profitability and will position farmers to market their crops more successfully and profitably in the war-affected context. Harvest’s target commodities are barley, corn, soybean, sunflower, and wheat. Harvest has three objectives and expected results and indicators. The three objectives are: 1) Profitable, Climate-Smart, Market-Oriented Production Expanded, 2) Farmers’ Access to Profitable Markets Improved, and 3) Market System Efficiency and Inclusiveness Improved.

The Harvest Rapid Market Assessment survey and interviews of farmers, traders, a brokers found that Ukrainian farmers lack timely market information and specialized services. Farmers are losing money while selling their commodities at harvest time, when prices are the cheapest, and one of the reasons is that they don’t plan their sales in advance due to not having access to timely and accurate market information as well as not understanding the importance of sales planning. The key factor in the economic success of any agricultural enterprise is the choice of the right time for the sale of the grown crop. To do this, it is necessary to forecast the dynamics of price movements and various scenarios for the implementation of the grown crops. However, most agricultural producers with a land bank of up to 2000 hectares (Harvest Target Audience) still have a rather poor understanding of all the possibilities of such an important sales planning tool as market analytics.

Based on research only about 30% of SMEs regularly or occasionally use analytics and understand its importance. About 30- 40% are interested in this tool but do not use it as they believe that the cost of a quality and easy-to-understand service is too high. The remaining 30% of the target audience do not believe in analytics at all and rely more on their own experience and available free sources of information. In addition, SMEs with farms of up to 500-1000 hectares are not able to export their crops by themselves and they need additional knowledge about export activities and requirements as well as access to buyers and/or brokers that will be able to facilitate export sales.

To address these challenges, Harvest is issuing this request for proposals to solicit offers to support targeted SME farmers access existing analytical platforms that provide timely market information and analytics, trainings, and sales matchmaking facilitation services between SME farmers and domestic and international buyers.

Offerors are invited to submit proposals in response to this RFP in accordance with **Section I Instructions to Offerors**, which will not be part of the subcontract. The instructions are intended to assist interested Offerors in the preparation of their offer. Any resulting subcontract will be guided by Sections II and III.

This RFP does not obligate Chemonics to execute a subcontract nor does it commit Chemonics to pay any costs incurred in the preparation and submission of the proposals. Furthermore, Chemonics reserves the right to reject any and all offers, if such action is considered to be in the best interest of Chemonics.

I.7. Instructions for the Preparation of the Proposal

1. Cover Letter

The offeror shall use the cover letter provided in Annex 1 of this RFP, which confirms organizational information and consent to the validity of this proposal.

2. Technical Proposal

The technical proposal shall comprise the parts below. Please note that the proposal must be responsive to the detailed information set out in Section II of this RFP, which provides the background, states the scope of work, describes the deliverables, and provides a deliverables schedule.

- Part 1: Technical Approach, Methodology and Detailed Work Plan. This part shall be between five (5) and fifteen (15) pages long but may not exceed fifteen (15) pages.

Technical proposals must include details of all services that can be made available to subscribers to the respective electronic platform. Harvest expects that offerors will develop and recommend different service levels that include different functionality and levels of service for different types of users. Offerors should clearly describe what each service level offering includes and to whom such service level is best suited (the ideal target customer). All services offered must be clearly described and include sufficient detail for Harvest to evaluate both quality and quantity of content and services so as to fully understand the offeror's value proposition for prospective subscribers. For example, if the platform provides matchmaking services to link sellers with buyers, offerors should be able to quantify the number of buyers and sellers active on the platform, cite the number of deals facilitated in the past 3 years, as well as the deal close rate and both total and average deal value over the same period. Offerors are expected to provide similar information/metrics on customer usage for all platform services proposed.

Furthermore, Harvest expects that successful offerors will be the primary conduit for marketing to potential new subscribers that will be supported by Harvest via the subcontract(s). As such, offerors should present a clear and detailed marketing and outreach plan describing how they will reach and onboard new subscribers to their respective platform(s). Sales channels should be described with justification provided for their selection. Metrics from previous marketing campaigns conducted by offerors may be included and will support any justification provided by the offerors for the marketing plan proposed.

- Part 2: Management, Key Personnel, and Staffing Plan. This part shall be between two (2) and five (5) pages long but may not exceed five (5) pages. CVs for key personnel may be included in an annex to the technical proposal and will not count against the page limit.

Offerors shall propose staff for the following key personnel positions necessary for the implementation of the scope of work:

Account/Project Manager: The account/project manager will be the primary point of contact for Harvest during implementation of the subcontract. S/he will be responsible for providing Harvest with regular reporting and analysis of subcontract implementation, with a focus on marketing and outreach efforts, sales channel analysis, deal flow for matchmaking services, and customer usage and satisfaction, among other areas of interest to Harvest. S/he must be a fulltime employee of the platform and empowered to take actions required to ensure smooth implementation of the subcontract. This position is not directly billable to the subcontract. Offerors must ensure that the proposed candidate for this key personnel role meet professional and academic standards that are appropriate for the position. Offerors must propose the relevant standards, which will be evaluated for their appropriateness.

- Part 3: Corporate Capabilities, Experience, and Past Performance. This part shall be between three (3) and seven (7) pages long but may not exceed seven (7) pages.

Part 3 must include a description of the company and organization, with appropriate reference to any parent company and subsidiaries. Offerors must include details demonstrating their experience and technical ability in implementing the technical approach/methodology and the detailed work plan.

Additionally, offerors must include at least three (3) past performance references of similar work (under contracts or subcontracts) previously implemented as well as contact information for the companies for which such work was completed. Contact information must include at a minimum: name of point of contact who can speak to the offeror's performance, name and address of the company for which the work was performed, and email and phone number of the point of contact. Chemonics reserves the right to check additional references not provided by an offeror.

3. Cost Proposal

The cost proposal is used to determine which proposals represent the best value and serves as a basis of negotiation before award of a subcontract.

Harvest intends to finance the subcontract based on the offerors' annual, per user, subscription fees presented in the cost proposal. As noted above, Harvest expects that offerors will present one or more levels/tiers of service that are priced differently based on the level of content and services provided to each tier. Offerors may propose as many pricing tiers as they determine efficient and effective to provide target customers (SME farmers with land banks between 5 and 2000 hectares) with different, yet effective and appropriate, options for subscriptions. Offerors should include in their cost proposal their commercially advertised subscription rates and then discount against this price when making their best and final price offers. Harvest will then apply a further subsidy on these discounted rates to incentive target SME farmers to sign up for the respective platform's subscription services. Harvest may apply different levels of subsidy to different pricing tiers that offerors may proposed. SME Farmers (new subscribers) will be required to pay the balance between the offeror's discounted price and the subsidy applied by Harvest. The table below illustrated the proposed pricing methodology. All numbers used are illustrative for demonstration purposes ONLY and should not be assumed to be the expectation of Harvest as regards offeror's discounts nor subsidies to be applied. Final subsidy amounts will be decided by Harvest based on the discounted pricing received from offerors. Harvest expects to subsidize up to 500 farmer subscriptions during the first year of the activity..

Table 1: Illustrative Pricing Table

Commercial Pricing (Publicly Advertised)		Offeror Discount %	Price Charged to Harvest	Harvest Subsidy		Balance Paid by Farmer
				%	\$	
Tier 1 (Gold)	\$2000 / year	30%	\$1400 / year	30%	\$420	\$980
Tier 2 (Silver)	\$1500 / year	30%	\$1050 / year	40%	\$420	\$630
Tier 3 (Bronze)	\$1000 / year	30%	\$700 / year	60%	\$420	\$280

The price ceiling of the subcontract to be awarded will be an all-inclusive fixed price ceiling, based on the agreed upon pricing tiers and a maximum number of subscribers to be supported at each tier. For example, if Harvest agrees to support up to 200 farmers for Tier 1 subscriptions and 150 each for Tiers 2 and 3, per the table above the subcontract ceiling will be fixed at \$210,000 (\$420 subsidy x 500 farmers). During implementation of the subcontract, offerors may request to shift subscription ceilings between tiers based on demand but under no circumstances will the fixed price ceiling of the contract be exceeded. Harvest will only pay subsidies for those farmers who subscribe to the platform and pay their required contribution first, with the platforms required to provide Harvest with evidence of subscription and payment prior to the payment of the subsidy by Harvest.

Harvest expects that new subscribers supported by the activity will include a minimum of 20% women representatives of SMEs into the activity as well as other representatives of various vulnerable groups (such as veterans and disabled, in addition to women). Harvest highly encourages offerors to offer special discounted pricing plans for these groups.

No profit, fees, taxes, or additional costs may be added after award. Because HARVEST is a USAID funded project and is implemented under a bilateral agreement between Ukraine and the U.S. Government, offerors must not include VAT and customs duties in their cost proposal.

PLEASE NOTE: Offerors must affirmatively state in the offer that they understand Chemonics is VAT exempt, and that this exception will be recognized for all invoicing. Failure to affirmatively state Offerors intention to recognize the Ukrainian VAT exemption may be grounds for exclusion for consideration and award of a contract under this RFP.

I.8 Evaluation and Basis for Award

This RFP will use the tradeoff process to determine best value as set forth in FAR 15.101-1. That means that each proposal will be evaluated and scored against the evaluation criteria and evaluation sub-criteria, which are stated in the table below. Chemonics will award a subcontract to the offeror whose proposal represents the best value to Chemonics and the Harvest Activity project. Chemonics may award to a higher priced offeror if a determination is made that the higher technical evaluation of that offeror merits the additional cost/price.

Evaluation points will not be awarded for cost, but for overall evaluation purposes of this RFP, technical evaluation factors other than cost, when combined, are considered significantly more important than cost factors. Cost will primarily be evaluated for realism and reasonableness. If technical scores are determined to be nearly equal, cost will become the determining factor.

In evaluating proposals, Chemonics will use the following evaluation criteria and sub-criteria:

Evaluation Criteria	Evaluation Sub-criteria	Maximum Points
Technical Approach, Methodology, and Detailed Work Plan		
	Proposed Service Packages/Tiers – Chemonics will assess the quality and quantity of the service packages/tiers proposed by offerors. I.9 Negotiations

Best offer proposals are requested. It is anticipated that a subcontract will be awarded solely on the basis of the original offers received. However, Chemonics reserves the right to conduct discussions, negotiations and/or request clarifications prior to awarding a subcontract. Furthermore, Chemonics reserves the right to conduct a competitive range and to limit the number of offerors in the competitive range to permit an efficient evaluation environment among the most highly-rated proposals. Highest-rated offerors, as determined by the technical evaluation committee, may be asked to submit their best prices or technical responses during a competitive range. At the sole discretion of Chemonics, offerors may be requested to conduct oral presentations. If deemed an opportunity, Chemonics reserves the right to make separate awards per component or to make no award at all.

I.10 Terms of Subcontract

Section II Background, Scope of Work, Deliverables, and Deliverables Schedule

II.1. Background

The Harvest Activity is 5-year program financed by the United States Agency for International Development (USAID) and implemented by Chemonics International in Ukraine. The goal of Harvest is to support male and female grain and oilseed farmers, including those from marginalized and underserved groups to return production and income for target commodities to at least pre-war levels while improving production efficiency and profitability and will position farmers to market their crops more successfully. The Harvest Project focuses specifically on the following target commodities: barely, corn, soybean, sunflower, and wheat. In addition to farmers, Harvest will support other value chain actors, such as SME traders, aggregators, and processors, that also work with the previously mentioned target crops to improve their competitiveness and business efficiency in support of helping Ukrainian grain and oilseed farmers increase production and sales.

II.2. Scope of Work

This activity focuses on supporting SME farmers to access robust tools for managing price risks, on teaching them to analyze cause-and-effect relationships in the market and accordingly increasing their margins by improving their selling prices. Harvest will subsidize farmer access to existing analytical platform(s), which will both incentivize access for farmers who may have not subscribed to such platforms previously while also help platforms attract new subscribers and grow their businesses. Through this activity, Harvest will subsidize access for SME farmers to the platform, while platform(s) will provide supported new subscribers with, at a minimum, a suite of online services that will include, at a minimum, market prices for targeted commodities, access to current buyers' prices and contact information, and the ability to post their sales offer. Furthermore, platform(s) advice on trading strategy, a reasoned explanation of such advice, price charts, and analyses of short-term market trends. Additional service that could be provided to SME farmers would be access to monthly online webinars in the format of "Training + Q&A," aimed to explain the cause-and-effect relationships in the market and preparing farm/firm employees to independently work with analytics, interpret it correctly, and adapt the farm/firm's trading strategy to be more responsive to both internal needs and international market factors. Harvest expects that should SME farmers have access to such high-quality market information and market linkage support, such farmers will be able to realize an increase in sales prices by up to 5%, which will help justify the ongoing investment by farms/firms in such services when the Harvest subsidy ends. Harvest will support partner platform(s) to track impact on new subscriber sales, which will help improve the platform(s) value proposition and future marketing position.

The proposed activity targets up to 500 SME Farmers (5 to 2000 hectares). Supported crops include only wheat, barley, sunflowers, corn, and soybeans. No geographic restrictions will be applied to eligible SME Farmers. While the activity will directly support farmer access to platform(s) via the proposed subsidies, the activity will indirectly support trading companies and processing companies who are actively purchasing grain and oilseed on the local market by making their participation on the partner platform(s) more attractive through the additional on new farmers/suppliers offering product for sale. Harvest will also make effort to refer international buyers to the platform(s), thereby creating additional competition that drives better pricing for farmers.

II.3. Deliverables

The successful offeror shall deliver to Chemonics the following deliverables, in accordance with the schedule set forth in II.4 below.

Harvest expects that successful offerors will continuously market and onboard new subscribers to the platform(s). As such, monthly deliverables are expected though Harvest will consider quarterly deliverables if more convenient for offerors. Another option can be to structure deliverables based on the fixed number of subscribers enrolled regardless of time period (i.e. payment in tranches for each 100 subscribers enrolled). Regardless of how deliverables are structured, Harvest will only pay for performance with payments based solely on the number of new subscribers enrolled on the platform during a given period. Once the subcontract's period of performance ends, Harvest will only pay for the actual number of farmers enrolled, regardless of the number of farmers included in the contract's ceiling.

Deliverable No. 1: Monthly/Quarterly Deliverable for Month/Quarter TBD, 2025

Each monthly/quarterly deliverable shall include the following information:

- New subscriber report detailing the names, contact information and farm information for new subscribers onboarded to the platform(s) during the reporting period. Harvest will provide offerors with the required demographic data that must be collected from each new subscriber.
- Marketing report detailing the market outreach efforts conducted by the offeror during the reporting period. The marketing report should include relevant outreach statistics by sales channel, and analysis of conversion rates, and proposed new marketing actions for the next reporting period.
- Customer usage report detailing how the onboarded customers are using the services provided by the platform. The customer usage report contents will be derived from information provided by offerors in their technical proposal. If the platform(s) provides matchmaking services, a detailed matchmaking section must be included providing an analysis of sales facilitated by the platform in terms of price, volume, and end market – at a minimum. Harvest may request that platform(s) facilitate surveys of new subscribers for the purposes of monitoring and evaluation of the activity. In such cases, platforms should include a summary of facilitation support for Harvest surveys in the customer usage report.
- Success story: during each reporting period, offerors must develop at least one success story sharing the story of a new platform user and how the platform has benefitted their business. Offerors should provide stories of both farmers supported by the activity as well as of new buyers attracted to the platform due to the increase in sellers offering their products via the platform.
- Platform development report: Offerors should describe how they are using the increased revenue generated by the Harvest activity to continue to develop and expand the functionality of their platform(s). Each report should include a platform development roadmap and progress achieved during the reporting period against the road map.

II.4. Deliverables Schedule

The successful offeror shall submit the deliverables described above in accordance with the following deliverables schedule:

Annex 2 Guide to Creating a Financial Proposal for a Fixed Price Subcontract

The purpose of this annex is to guide Offerors in creating a budget for their cost proposal. Because the Subcontract will be funded under a United States government-funded project, it is important that all Offerors' budgets conform to this standard format. It is thus recommended that Offerors follow the steps described below.

Under no circumstances may cost information be included in the technical proposal. No cost information or any prices, whether for deliverables or line items, may be included in the technical proposal. Cost information must only be shown in the cost proposal.

Step 1: Create a budget for the cost proposal. Each Offeror must create a budget using a spreadsheet program compatible with MS Excel. The budget period should follow the technical proposal period. An Illustrative Pricing Table is provided below.

All cost information must be expressed in the Ukrainian local currency – UAH.

Step 2: Write Budget Narrative. The spreadsheets shall be accompanied by written notes in MS Word (or directly in the table as indicated below) that clearly describe in sufficient detail the package of service(s) that are included in the subscription price offered for each service-level tier proposal.

The price ceiling of the subcontract to be awarded will be an all-inclusive fixed price ceiling, based on the agreed upon pricing tiers and a maximum number of subscribers to be supported at each tier. For example, if Harvest agrees to support up to 200 farmers for Tier 1 subscriptions and 150 each for Tiers 2 and 3, per the table above the subcontract ceiling will be fixed at \$210,000 (\$420 subsidy x 500 farmers). During implementation of the subcontract, offerors may request to shift subscription ceilings between tiers based on demand but under no circumstances will the fixed price ceiling of the contract be exceeded. Harvest will only pay subsidies for those farmers who subscribe to the platform and pay their required contribution first, with the platforms required to provide Harvest with evidence of subscription and payment prior to the payment of the subsidy by Harvest.

Harvest expects that new subscribers supported by the activity will include a minimum of 20% women representatives of SMEs into the activity as well as other representatives of various vulnerable groups (such as veterans and disabled, in addition to women). Harvest highly encourages offerors to offer special discounted pricing plans for these groups. Harvest will determine the final Harvest subsidy amount to be provided at each service level based on the offers received and an internal determination on a subsidy amount that will allow the activity to achieve its objectives and ensure optimal rates to subscription by target farmers.

Certification Regarding Responsibility Matters (Apr 2010)

(a)(1) The Offeror certifies, to the best of its knowledge and belief, that—

(i) The Offeror and/or any of its Principals—

(A) Are ☐ are not ☐ presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(B) Have ☐ have not ☐, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, state, or local) contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(C) Are ☐ are not ☐ presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph (a)(1)(i)(B) of this provision;

(D) Have ☐, have not ☐, within a three-year period preceding this offer, been notified of any delinquent U.S. Federal taxes in an amount that exceeds \$3,000 for which the liability remains unsatisfied.

(1) U.S. Federal taxes are considered delinquent if both of the following criteria apply:

(i) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(ii) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(2) Examples.

(i) The taxpayer has received a statutory notice of deficiency, under I.R.C. § 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(ii) The IRS has filed a notice of U.S. Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. § 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(iii) The taxpayer has entered into an installment agreement pursuant to I.R.C. § 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(iv) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(ii) The Offeror has () has not (), within a three-year period preceding this offer, had one or more contracts terminated for default by any U.S. Federal agency.

(2) "Principal," for the purposes of this certification, means an officer, director, owner, partner, or a person having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a subsidiary, division, or business segment; and similar positions).

This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Section 1001, Title 18, United States Code.

(b) The Offeror shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Offeror learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

(c) A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Offeror's responsibility. Failure of the Offeror to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Offeror nonresponsible.

(d) Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of an Offeror is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

(e) The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Offeror knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

Annex 4**UEI and SAM Registration Guidance****What is an UEI Number?**

The Unique Entity Identifier, or the UEI, is the official name of the “new, non-proprietary identifier” that will replace the DUNS number. The UEI will be requested in, and assigned by, the System for Award Management (SAM.gov). Businesses and organizations who receive funding from the US government will have to use a Unique Entity Identifier (UEI) created in SAM.gov. The UEI number helps the USG to identify companies.

Why am I being requested to obtain a UEI number?

U.S. law – in particular the Federal Funding Accountability and Transparency Act of 2006 (Pub.L. 109-282), as amended by section 6202 of the Government Funding Transparency Act of 2008 (Pub.L. 110-252) - make it a requirement for all entities doing business with the U.S. Government to be registered, currently through the System for Award Management, a single, free, publicly- searchable website that includes information on each federal award. As part of this reporting requirement, prime contractors such as Chemonics must report information on qualifying subawards as outlined in FAR 52.204-10 and 2CFR Part 170. Chemonics is required to report subcontracts with an award valued at greater than or equal to \$30,000 under a prime contract and subawards under prime grants or prime cooperative agreements obligating funds of \$25,000 or more, whether U.S. or locally based. Because the U.S. Government uses UEI numbers to uniquely identify businesses and organizations, Chemonics is required to enter subaward data with a corresponding UEI number.

Is there a charge for obtaining a UEI number?

No. Obtaining a UEI number is absolutely free for all entities doing business with the Federal government. This includes current and prospective contractors, grantees, and loan recipients.

How do I obtain a UEI number?

UEI numbers can be obtained online at SAM.gov.

What information will I need to obtain a UEI number?

To request a UEI number, you will need to provide the following information:

- Legal name and structure
- Tradestyle, Doing Business As (DBA), or other name by which your organization is commonly recognized
- Physical address, city, state and Zip Code
- Mailing address (if separate)
- Telephone number
- Contact name
- Number of employees at your location
- Description of operations and associated code (SIC code found at <https://www.osha.gov/pls/imis/sicsearch.html>)
- Annual sales and revenue information

- Headquarters name and address (if there is a reporting relationship to a parent corporate entity)

How long does it take to obtain a UEI number?

The UEI number is issued immediately upon completion of the request process.

Are there exemptions to the UEI number requirement?

There may be exemptions under specific prime contracts, based on an organization's previous fiscal year income when selected for a subcontract award, or Chemonics may agree that registration is impractical in certain situations. Organizations may discuss these options with the Chemonics representative.

What is CCR/SAM?

Central Contractor Registration (CCR)—which collected, validated, stored and disseminated data in support of agency acquisition and award missions—was consolidated with other federal systems into the System for Award Management (SAM). SAM is an official, free, U.S. government-operated website. There is NO charge to register or maintain your entity registration record in SAM.

When should I register in SAM?

While registration in SAM is not required for organizations receiving a grant under contract, subcontract or cooperative agreement from Chemonics, Chemonics requests that partners register in SAM if the organization meets the following criteria requiring executive compensation reporting in accordance with the FFATA regulations referenced above. SAM.gov registration allows an organization to directly report information and manage their organizational data instead of providing it to Chemonics. Reporting on executive compensation for the five highest paid executives is required for a qualifying subaward if in your business or organization's preceding completed fiscal year, your business or organization (the legal entity to which the UEI number belongs):

- (1) received 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; **and**
- (2) \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; **and**,
- (3) The public **does not** have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI number it provided belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the US Internal Revenue Code of 1986.

If your organization meets the criteria to report executive compensation, the following sections of this document outline the benefits of and process for registration in SAM.gov. Registration may be initiated at <https://www.sam.gov>. There is NO fee to register for this site.

Why should I register in SAM?

Chemonics recommends that partners register in SAM to facilitate their management of organizational data and certifications related to any U.S. federal funding, including required executive compensation reporting. Executive compensation reporting for the five highest paid executives is required in connection with the reporting of a qualifying subaward if:

- a. In your business or organization's preceding completed fiscal year, your business or organization (the legal entity to which the UEI number belongs) received (1) 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and (2) \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and,
- b. The public have does not have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI number it provided belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986.

What benefits do I receive from registering in SAM?

By registering in SAM, you gain the ability to bid on federal government contracts. Your registration does not guarantee your winning a government contract or increasing your level of business. Registration is simply a prerequisite before bidding on a contract. SAM also provides a central storage location for the registrant to supply its information, rather than with each federal agency or prime contractor separately. When information about your business changes, you only need to document the change in one place for every federal government agency to have the most up-to-date information.

How do I register in SAM?

Follow the step-by-step guidance for registering in SAM for assistance awards (under grants/cooperative agreements) at: https://www.fsd.gov/sys_attachment.do?sys_id=d4d157741ba3c5103565ed3ce54bcba0

Follow the step-by-step guidance for contracts registrations at:

https://www.fsd.gov/sys_attachment.do?sys_id=b4c153341ba3c5103565ed3ce54bcbb8

You must have a UEI number in order to begin either registration process.

If you already have the necessary information on hand (see below), the online registration takes approximately one hour to complete, depending upon the size and complexity of your business or organization.

What data is needed to register in SAM?

SAM registrants are required to submit detailed information on their company in various categories. Additional, non-mandatory information is also requested. Categories of required and requested information include:

- * General Information - Includes, but is not limited to, UEI number, CAGE Code, company name, Federal Tax Identification Number (TIN), location, receipts, employee numbers, and web site address.
- * Corporate Information - Includes, but is not limited to, organization or business type and SBA-defined socioeconomic characteristics.
